Sports Day Program Good Entertainment

Consort Wins Ball Tournament

Oyen's annual sports day, held under the auspices of Oyen board of trade last Wednesday, drew a large crowd, which was favored with pleasant holiday weather.

Six teams competed in the baseball tournament, Oyen and Consort playing off in the final game. In the opening game Oyen had an easy victory over Youngstown. Chinook and Acadia Valley were next up, Chinook winning. Consort and Scottfield were the next contenders, the game going to Consort by a narrow margin. It was an excellent exhibition of ball playing. Oyen drew a bye, and Consort and Chinook then played off, Consort winning.

Consort defeated Oyen in the final game by a margin of six runs, one disastrous innings being responsible for most of the winning runs.

Men's and girls' soft ball games were keenly contested and provided good entertainment for the spectators. Scottfield were winners of the girls tournament, defeating Oyen in the finals by one run.

In the men's soft Thayer's team and Church's team were winners of first and second money.

In the evening the Will Rogers in "Down to Earth" proved a most popular attraction.

A dance after the show was well attended, the music by Al's Red Aces making a big hit.

Masons and their families from this district, Chinook and Youngstown are holding a picnic today in Magnuson's grove near Cereal.

June School Report

Oyen Juniors and Intermediates

Grade III—Kathleen Kelly 82.7, Stanley Krewski 82.7, Billy Neid 82, Leo Wendling 81.3, Edward Kemp 80 (honors); Margaret B. Lees 75.3, Larry Thygesen 72.1, Margaret Bradford 69.4, Leonard Smale 68.7, Christine Lees 61.4.

Senior Grade III—Mary Wendling 86.6, Teresa Wendling 83.5, Beth Scott 80.5, Colleen Trowin 80.5 (honors); Gordon Gibson 76.8.

Junior Grade II—Jack Duffy 83.2 (honors); Elnora Peterson 73.2, Ursula Robinson 71, Johnnie Robinson 69.7, Everett Thygesen 65.9, Dorothy Johnson 59.9.

Says Capitalist Nations Should Pool All Scientific Knowledge To Meet Soviet Trade Challenge

Warning that capitalist nations must pool all scientific knowledge and trade secrets to meet the "challenge of Soviet Russia's industrial system and end unemployment," was voiced before the American Association for the Advancement of Science.

Only by this means could the nations that now are in the lead industrially survive the summer meeting of the association.

"There is in the U.S.S.R.," he said, "a larger body of organized research workers under unified control than exists in any other industrial country in the world. The Soviet government looks to science to play a most important part in its industrial and economic activities."

"Whether the Soviet plan succeeds or fails, already enough has been accomplished to show the possibilities of this combined scientific effort. Even partial success may have far-reaching effects on the rest of the industrial world."

This situation is developing at a time when there is little industrial co-operation between the other countries of the world. This challenge of a communal to a competitive plan justifies a careful consideration of the advantages of further co-operation especially in the matter of pooling of scientific resources and experience.

"With the lead that the foreign manufacturing countries jointly possess and with the fuel they are being made of their joint scientific resources, it should be possible to meet the challenge successfully."

Navigates Her Own Craft

Twenty-One-Year-Old Nova Scotia Girl Has Master's Papers

Nova Scotia has almost as many sea captains as Kentucky has bluegrass, with the difference that the Nova Scotia sailors have a better right to their titles because of experience, ability and nerve. But one captain, however, stands unique—unique because she is a woman.

Captain Mildred I. Wamboldt, 21-year-old maiden of Lunenburg, is probably the only female in Nova Scotia who not only owns but also masters papers and actually navigates her vessel. And the craft is no toy yacht. It is the 422-ton, 100-ton schooner E. P. Theriault.

"Why, I don't think I could live if I had to stay ashore," the pretty young sailor declares.

Born of a long line of sea-faring forebears, she boasts that she hasn't been six months at sea without past nine years. Bred to the sea, she made many trips with her foster-father, Angus Piddington, Staten Island, N.Y., formerly of Lunenburg. There she made a specialist of navigation.

Now her schooner is registered in her name. As master, she signs the clearance papers, transacts all the business of the craft, and rules with a firm hand her crew of one Nova Scotian and eight natives of Barbados. Her foster-parent accompanies her on her voyages, but only as mate. She trusts the schooner to no one but herself.

Captain Mildred is no fair-weather sailor. Last February she sailed from Turke Island with mail for New York, but when 250 miles from destination, the craft was caught in a terrible gale. The vessel was forced to turn and run before the wind. Her sails were stripped from her and her gear damaged. By the time the hurricane had blown itself out, the E. P. Theriault had been blown within 100 miles of Barbados. The young captain put into the islands, and sold her cargo there.

She makes Barbados from Shelburne in 10 days, and from Bridgeview in 17 and 10 days, on different voyages. She made a trip from Bridgeview to Turke Island in 13 days, all considered very good time.

The E. P. Theriault, built on the Fundy shore, is now registered at Bridgeview, Barbados.

Wore Large Shoes

Chief attractions of the state museum in Missouri's state house at Jefferson City are a pair of shoes, size 22, once worn by Miss Elizabeth. She was a native Missourian, who died several years ago, and was 8 feet 4 inches tall. She was supposed to be the "largest woman in the world" during her life.

W. N. I. 1902

Buildings In Miniature

Young Man Kept Busy Creating Models For Architects

Houses of cardboard and plaster and paint, built on a drafting board with safety-razor blades and paper punches and old knives—that is the daily work of Al Allard, a young Minneapolis man.

Al Allard's interest in midsize buildings dates from that Lon Chaney movie, "The Phantom of the Opera."

Taking a tip from the miniature sets which were an important part of the picture, this handy young man built his first model, patterned after one of the castles used in the film. By contrast with the intricacy of detail which he has since developed and achieved that first effort was rather simple and inept.

But at least it was a start, the first of several scores of models that have sprung from his work table. Chartered by the manager of the theatre where Allard worked and exhibited in a department-store window as part of an exploitation "gag," the little castle attracted much attention of a Hollywood studio executive visiting Minneapolis.

Critically the executive examined the little castle and promised to get in touch with Mr. Allard in his relation to Hollywood. She failed to do so, but the miniature builder's enthusiasm and ambition had been fired.

Into the life of Mr. Allard burst a St. Paul architect burgeoning with a problem. "Listen," commanded the architect, "I'm trying to set a committee on the design for a new church, but they can't get together."

"I think I'd had a model to show them they would like the design. I'll give you three weeks to finish the job and you can name any price within reason."

His experience as a creator of these little houses, castles and cathedrals and the appearance of reality that he has been an instructor in many of the fundamentals of architecture and architecture as developed in his own credo of philosophy of this craft—Progress.

Victim Of Imagination

"Cancer-Phobia" Causes Man To Take His Own Life

Perfectly healthy for a man of his age, William Dyer, 60, of Fernow Road, Paddington, England, became so obsessed with the idea that he had cancer that he killed himself—a victim of pure imagination.

Holding an inquest, the Paddington coroner, Mr. Ingely Odell, pointed out that it was a common mistake for people to imagine they had cancer, and commented: "This is a case of cancer-phobia."

The evidence made it clear that Dyer had committed suicide as a direct result of depression induced by the belief that he had cancer.

Medical testimony made it equally clear that the man had no disease whatsoever.

Not In His Line

Paddy, who was eager to obtain work went to the employment exchange.

"Anything this morning?" he asked the clerk.

"Yes," said the clerk after a glance at his book. "There's a job at the Eagle Laundry. Do you want it?"

"Paddy shifted uneasily from one foot to another.

"Well," he said, "it's like this, I really want work mighty bad, but the fact is I ain't never washed an eagle."

Not Wanted In Canada

It has been pointed out that the average family on relief in Canada is much better off than a family of workers in Russia. This does not, of course, help to lessen discontent in the country or allay the feelings of those who prefer work to relief, but it points the way that Bolshevism is no cure-all for the present conditions or one to be at all invited.

"Nature is an original artist," we read. That is why she is often scorned to copy the pictures on flower seed packets.

China expects excellent crop yields this year.

Selling More Art Treasures

Earl of Egmont's Precious Silver Plate Going Into Auction's Room

More treasures of the vanishing Earl of Egmont are to be sold at Christie's in London. The old masters and other pictures inherited by the late Earl have already been dispersed, and now the massive silver plate is coming in to the auction room.

It is only four years since Frederick Joseph Trevelyan Perceval left his ranch in Alberta and went to England to settle at Avon Castle, Hingwood, Hants, as the tenth Earl of Egmont.

The silver plate was to be sold contains a good deal of 18th century silver, masters, medals, and the like, several of which were especially made for the second Earl.

The most important item is a rare James I. silver-gilt wine-cup, an heirloom which had been presented to Lord Arden, another branch of the family, by Princess Elizabeth, afterwards Landgravine of Hesse Homberg, for use in his chapel at Nork. The Baron Arden was a Lord of the Admiralty about the end of the eighteenth century and was M.P. successively for Lancashire, Warwick, and Totton.

A set of three George I. plates is another rare item bearing the name of the celebrated London silversmith, Paul Marlier, 1725.

A German silver-gilt tankard has an inscription showing that it was presented to Lord Arden by Queen Charlotte, the consort of George III.

Dominion Offices For London

Headquarters Are All Together In Heart Of City

The opening of the handsome new offices of the government of South Africa by the King was interesting as another development of the bunching together of the Dominion offices in one particular part of London, England.

The South Africa building occupies one of the most commanding sites in the capital of the Empire at the corner of Trafalgar Square and the Strand, looking down Whitehall and over the street to Charing Cross. Generations of Londoners and overseas visitors know the building which stood there before—Morley's Hotel. Right across from it on the opposite corner of the Square, the Canada House, the offices of the High Commissioner, between these two points on the south side of Trafalgar Square are the offices of the Canadian Pacific and the Canadian National Railways. A few yards further west up another street are the offices of the British Columbia government. There is also a Canadian bank hard by.

Going past along the Strand are the premises of the government of Rhodesia, the office of the province of Ontario and almost opposite the latter the Australian offices.

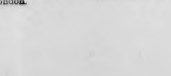

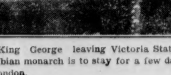

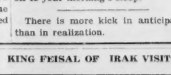

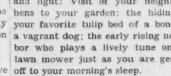

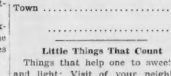

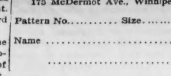

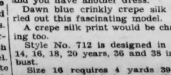

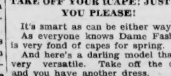

So that the overseas visitor seeking his headquarters is right in the heart of London wherever he comes from.—St. Thomas Times-Journal.

The world's supply of copper at the 1929 rate of consumption will only last about fifty years, in the opinion of certain scientists.

By lighting and heating a bee-hive by electricity in Europe recently the production of honey was increased 17 pounds.

By Ruth Rogers

Prince Of Wales Expresses Confidence In Canada's Ability To Emerge From Depression

Very Easy To Obtain

Newspaper Claims Unfathomable Poisons Sold Freely In England

Two drops applied to killing a man without traces are on sale at large chemists throughout the country, says a London newspaper.

They are supplied without question to any person, who demands them. One of them bears no "poison" mark on its bottle.

Neither of them can be detected after death.

Many poisonous substances are obtainable from all chemists, but these two are remarkable for the ease with which they are bought, for the impossibility of tracing them once they have been administered, and for the fact that they produce symptoms similar to those due to natural diseases.

The pathologist of a famous London hospital questioned by a newspaper representative about one of these substances, said "If ever I should be called to murder, this is what I should choose."

It is a protein-like compound, in daily use for the treatment of a common disease. It is supplied as a liquid in tubes which bear no poison mark. A child can buy it anywhere.

And yet the injection of the contents of a two-shilling tube induces coma followed by death in from four to six hours.

It is impossible to analyse, and it leaves no trace in the body after death.

A newspaper representative visited a chemist's shop near Oxford Street, and for two shillings he received a tube containing more than a fatal dose of the liquid.

The second deadly poison is a liquid made from the seeds of an Indian tree. The medical dose is one drop, and an overdose results in an exceedingly painful death.

Two grams are enough to produce fatal results.

It too, is impossible to detect after death.

At the same shop, two grams of the poison were bought for 1s. 6d. For this it was necessary to sign a receipt, but no steps were taken to verify the name and address given, and it was not asked to what use the drug was to be put.

Chemical Changes In Liquids

Scientists Find High Pitched Sounds Will Kill Bacteria

If the baby could cry at a higher pitch he might help make his own milk more digestible.

A study of the effect of sounds in causing chemical changes in milk was reported to the American Association for the Advancement of Science by Dr. E. W. Ford and L. A. Chambers of the University of Pennsylvania Medical School.

Scientists have recently learned that bacteria in milk, water, fruit juices and other liquids can be killed by "super sounds" of very high pitch.

Less than one-twentieth of the people in Britain now pay income taxes.

Where Men Excel

Better Than Women At Guessing What Children Like

Men are more adept at selecting amusements for children than are women, says Florence Baumbarger, in one of two new professional studies at Hopkins University. Men know better what children like; women know better what is good for them, she contends.

Miss Baumbarger bases her belief on an experiment she conducted in compiling information for a volume in the art of developing children's books. In this she discovered new women were able to select subjects that appealed to children, but men were better. The reason for men's ability along this line, she thinks, comes from the fact that the time they "spend" with the children is largely in play. Women are occupied with the technical aspects of rearing children.

Selling Big Japanese Coin

Largest Gold One In World Weighs Nearly Four Ounces

The Japanese Oban, the largest gold coin in the world, is to be sold at London, England.

Stamped with the seals of the government mint, the Japanese Oban is a large oval plate of gold measuring five inches across, and weighs nearly four ounces.

The coin was signed in Japanese ink by the superintendent of the mint as a guarantee of its purity. The signature was considered the most important part of the coin, and if it was rubbed off the plate ceased to be current money.

Had Long Wait

When Peggy returned from her first day at school she was asked how she enjoyed it.

"I like it all right," said Peggy, "but I didn't get any present."

"But what made you think that you would get a present?"

"Teacher said, 'Sit there all morning and never get one.'"

Brazil's Surplus Coffee

Brazil this year will have the biggest crop of coffee in history, millions of bags more than the world would use. It looks as if that country will have to continue its losses, having already burned more than 15,000,000 sacks.

Here we see His Majesty King George leaving Victoria Station with King Feisal of Iraq on their way to Buckingham Palace where the Arabian monarch is to stay for a few days. King Feisal is acknowledging an enthusiastic reception by the people of London.

WORLD PARLEY IS SAVED FROM UTTER COLLAPSE

London, Eng.—The world economic conference, on the verge of collapse, was saved from complete failure by action of Prime Minister R. B. Bennett of Canada.

President Franklin Roosevelt of the United States.

Decision of the conference steering committee will permit the meeting to continue on a restricted agenda, from which all monetary and tariff questions were removed at insistence of France and the European gold-bloc.

A sudden switch in the American attitude, dictated in a telephone conversation between the president and Secretary of State Cordell Hull, placed the United States firmly behind continuation and received immediate, vigorous support from Mr. Bennett.

The energy of Mr. Bennett's appeal in turn over Neville Chamberlain, British Chancellor of the Exchequer, who had been only lukewarm toward the idea of continuing under present circumstances.

When the vote was taken, France, alone of the 12 nations represented on the steering committee held out for adjournment.

The gold group had regarded Mr. Chamberlain as leading to their view, but the force of Mr. Bennett's argument, representing as it did the wishes of the British Dominions, swung him quickly to their side.

The stand of Georges Bonnet, French Finance Minister and leader of the gold-bloc, was weakened in the final stages of debate by recalcitrance of other group members. In the end, the British Empire, of which Mr. Bonnet was a strong supporter of gold policy, voted in favor of continuing.

Future outcome of the conference however, was limited by French and gold-bloc insistence they will not participate in any discussion of monetary questions.

The steering committee recessed at lunch, after three and a half hours of heated discussion without reaching any decision upon the question of adjournment. Resuming after lunch, the delegates decided to continue.

Leaving the meeting, Prime Minister R. B. Bennett of Canada, expressed himself as "pleased with the proceedings of the bureau up to this point."

It was well known Mr. Bennett was leading delegates of all the Dominions in a strenuous fight to save the conference from collapse. He was understood to have strongly stressed during the heated morning session that a recess of the conference at this time would be a step in the wrong direction.

Prime Minister Bennett is the only delegate from the Dominions who is a member of the conference's steering committee, which is led by the leaders. But in opposing adjournment of the conference he was presenting a view in which by all accounts.

When the steering committee decided the point at issue was the program of conference work submitted by Cordell Hull of the American delegation. The French were opposing the American program. They are willing to leave the conference in being only for discussion on marketing and production of commodities.

Goodwill Air Tour

Twenty-five Planes From Winnipeg To Tour Western Provinces

Winnipeg, Man.—Under the leadership of T. M. "Pat" Reid, well-known war-time aviator, the third annual Manitoba goodwill air tour will cover the three prairie provinces this year. It was announced Thursday.

Between 20 and 25 planes will sweep westward as far as Edmonton, taking off from Winnipeg Aug. 5 and returning Aug. 20. Aim of the tour is to demonstrate speed and safety of aerial travel and progress Canada has made in aviation.

Historical Page at Prince Albert, Sask.—Four hundred performers will take part in the historical pageant being prepared for the golden jubilee Prince Albert annual exhibition July 31 to August 3 inclusive. One hundred and eight small girls, 64 young men and 212 young women will be required for the production being prepared for presentation before the grand stand.

W. N. U. 2002

Plan New Processing Tax

U.S. Farm Officials Expect Large Return From Levy On Hogs

Washington.—United States farm administrators have drafted tentative plans calling for a processing tax on hogs by Oct. 1 to provide up to \$150,000,000 to finance application of the Farm Act to corn and wheat. The plans will not take final form until after a meeting of corn and hog producers and their representatives which secretary of agriculture Henry Wallace has suggested be called in mid-July to obtain a cross-section of sentiment regarding the relation of the act to the two related products of the corn belt that have suffered from low prices in recent years.

If the levy is approved in connection with a corn-hog program to be worked out by August 1, it would be the fourth processing tax to go into effect before winter sets in. The 3-cent a hundred wheat tax became effective at midnight, July 8; a maximum processing tax on cotton, probably four cents, is to become effective on August 1. If the acreage reduction campaign now under way in the cotton belt succeeds, and a processing tax of about six cents a pound is to be levied on cigar leaf tobacco by October 1.

Death Toll Was Heavy

Accidents Take 144 Lives In U.S. On Independence Day

New York.—Lives of 144 men, women and children paid for the celebration in United States of July 4th, 1934 anniversary of the republic. Automobiles accounted for 62 deaths; 46 persons drowned; six died as a result of fireworks, and 30 were killed from other accidental causes. Thousands of other celebrants suffered injuries, many were critically injured, and many were killed. Heavy shootings, fights and aeroplane accidents contributed to the death toll.

Chicago saw a parachute jumper fall to his death before 100,000 horrified spectators at the world's fair.

Peculiarly, Chicago, the play center of the nation as the result of the Century of Progress, escaped with but few automobile fatalities despite traffic-clogged streets that poured massive crowds into the world's fair ground.

Electrify Grain Elevators

Big Program Of Work Is Started In Alberta

Calgary, Alberta.—An electrification program for 175 Alberta grain elevators, to cost \$120,000, has been set on foot about the middle of this month. The program, which will turn out about 100,000 electrical motors, the paper adds, the co-operation of elevator companies, equipment manufacturers, contractors and officials of the Calgary Electric Company, power supply source, making the program possible. The work will bring jobs to men at present unemployed, the paper concludes.

Demand For Canadian Wheat

World Grain Show Delegate Sees Good Market In Britain

Winnipeg, Man.—"I look for a much broader demand for Canadian wheat in the near future," said William Smith, Edinburgh, Scotland, manager of the Scottish Co-operative Wholesale Society, who arrived in Winnipeg. Accompanied by Neil Boston, newly elected president of the society, Mr. Smith is en route to the World Grain Show at Regina this month.

To Repair Vessels

Kington, Ont.—One hundred men will be employed for the next three weeks or a month repairing the Canadian Steamship Lines grain carriers "Brentwood" at Kington. Tuesday morning a score started work on the vessel, damaged when it grounded a few weeks ago on route here with a cargo of grain. It was announced the job would cost between \$70,000 and \$80,000, the highest repair job in the district for some years.

Chinese Feel Insulted

Chicago.—The Chinese Consolidated Benevolent Association protested to the Century of Progress Exposition officials against the inclusion of the southern Manchurian exhibit in the Japanese concession at the exposition. A letter signed by Chew Low, president of the association, said the exhibit was "direct insult" to the Japanese.

Would Become Citizen

Vergin To Apply For Naturalization Papers

Kamsack, Sask.—Making his first appearance in public since he was released by order of Mr. Justice R. A. Robson at Winnipeg from custody of immigration officials who had detained him, Vergin, Doukhobor leader, told 2,000 of his followers from all parts of Saskatchewan and Manitoba, he had completed his five years' residence in Canada and he intends to apply for naturalization papers.

In the course of an address which dealt largely with religious matters, the spiritual as well as temporal head of the Christian Community of Universal Brotherhood, appealed to his audience to donate money to help suffering members of the community in Russia.

Independent Doukhobors at the meeting expressed the opinion the first duty of the community lay towards those of Canada's 10,000 Doukhobors who are suffering.

To Brave Niagara

Plans To Go Over The Falls In A Barrel

Niagara Falls, Ont.—Planning to venture over the foaming cataracts of Niagara Falls, Alfred Rioux, of this city, is scheduled this month to make the daring plunge, encased in an iron torpedo-shaped barrel.

The barrel Rioux intends to use, is of steel construction with a port-hole lower than the inside.

Rioux intends to plunge over the Horseshoe Falls, and through the lower rapids to Queenston.

Case Is Completed

Ottawa, Ont.—Hortyman P. Duff, chief justice of Canada, and Justice Willis Van Deventer of the United States supreme court, sitting as special commissioners, have completed their investigation into the "I'm Alone" sinking, and will render their report to the governments of the United States and Canada.

GRAIN TRADERS PONDER FUTURE MARKET TREND

Winnipeg, Man.—In the face of dwindling export business in Canadian wheat and the largest surplus Canada has ever had at this time, grain traders are causing increasing anxiety to their friends and it is understood he may take a long vacation, probably at sea.

A peerage for him has been mentioned if the low blood pressure, which he is suffering, makes his continuation in office inadvisable.

He was reported to have sold his country estate, Fritwell Manor, in Oxford.

Princess Royal Must Retire

Only Daughter Of King George And Queen Mary Of England.

London, Eng.—It was announced today that the princess royal has cancelled all her engagements.

"There is no reason other than that her royal highness has to rest," it was stated at her London home.

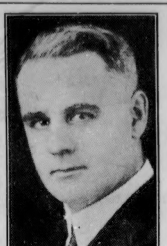

The Countess of Harewood, the princess royal's mother, is the only daughter of King George and Queen Mary of England.

RUSSIAN DELEGATE AND HIS ENGLISH WIFE

Here we see V. Litvinoff, leader of the Soviet Union delegation to the World Economic Conference, leaving the Geological Museum, where the conference is in session, with his wife, who is an Englishwoman.

HEADS ROTARY

John Nelson, native of Paisley, Ontario, and at one time editor or publisher of several leading Canadian newspapers, who was unanimously elected president of Rotary International at the meeting in Boston.

Whales From Churchill

To Be Placed On Exhibition At Chicago Fair

Saskatoon, Sask.—Saskatoon imported its first fish from Churchill—three saltwater herring for local diners' tables. And the herring will be followed by three white whales, intended for dinner tables but the world's fair at Chicago.

Proceeded for the Chicago show, the whales were caught off Churchill on June 29 and it is expected that they will make their first public appearance here during the next few days. S. H. Stebbings, Saskatoon, is endeavoring to make arrangements for showing them in a local cold storage plant.

The snowy whales are in ice for the train journey south.

Mr. Stebbings also expects to complete arrangements for a showing this summer on the class "A" western fair circuit.

May Take Vacation

Health Of Sir John Simon Is Causing Anxiety

London, Eng.—The health of Sir John Simon, British Secretary for Foreign Affairs, is causing increasing anxiety to his friends and it is understood he may take a long vacation, probably at sea.

A peerage for him has been mentioned if the low blood pressure, which he is suffering, makes his continuation in office inadvisable.

He was reported to have sold his country estate, Fritwell Manor, in Oxford.

Princess Royal Must Retire

Only Daughter Of King George And Queen Mary Of England.

London, Eng.—It was announced today that the princess royal has cancelled all her engagements.

"There is no reason other than that her royal highness has to rest," it was stated at her London home.

The Countess of Harewood, the princess royal's mother, is the only daughter of King George and Queen Mary of England.

Receive Warm Welcome

Thornton and MacDonald Reach Home After Release From Soviet Prison

London, Eng.—Cheer, flowers and kisses awaited L. C. Thornton and William MacDonald as they arrived here, released by the Soviet authorities at prison where they were serving sentences imposed on conviction of bribery and espionage.

Thousands thronged the station platform to welcome back the men whose freedom was obtained by the British embassy on Russian trade.

Thornton's little daughter somehow was passed through the crowd to her father's car almost before the train stopped and was immediately in her father's embrace.

Thornton declared he and MacDonald were full of gratitude to the British government and the British people for so staunchly taking action which resulted in their release.

He also expressed gratitude to Sir Edmund Grey, former British ambassador in Moscow and gratification at the confidence their own company had shown in the accused.

Utters Warning

Says U.S. May Demand West Indies Payment Of War Debt

London, Eng.—Warning the British West Indies might some day be demanded by the United States in payment of the British war debt, a declaration public opinion should be fully prepared, was uttered Thursday by Archbishop Julian of St. Kitts, presiding at the annual West Indies service at St. Andrew Church, Queen Victoria Street.

A certain section of politicians in America were already making such a demand, the archbishop said.

It was unthinkable, said Archbishop Julian, that England would ever agree to a demand from the United States for the British West Indies. Nevertheless public opinion should be prepared.

Free State Elections

Dublin Municipal Vote Indicates Swing Away From De Valera

Dublin, Irish Free State.—Supporters of President Eamon De Valera's republican Government in the Irish Free State are worried by failure of their forces to gain victory in the Dublin municipal elections.

Results of the election showed the city preponderantly in favor of the Nationalists and Independents who support former President William T. Cosgrave. Besides returning Lord Mayor Alfred Byrne, an Independent ally of Mr. Cosgrave, the electors gave seats to 22 Nationalist and Independent candidates and only 13 to the supporters of De Valera's regime.

The Nationalists hailed the result as indicative of a swing away from the Republican Government.

Ontario Dentists Robbed

Niagara Falls, Ont.—Five dental offices in Hamilton and Niagara Falls were robbed of gold and silver, and gold leaf, gold, silver and false teeth, by thieves. At Hamilton loss to three dentists through theft amounted to close to \$400.

Trade With Russia

British Government To Take Into Account Anglo-Canadian Agreement

London, Eng.—A questioner in the House of Commons was assured by a government spokesman that the talks between Britain and Russia, the British government will take into full account. Article 21 of the Anglo-Canadian trade agreement.

This provides that where the imperial preferences are endangered by the importation of products sold at an unfair price because of state subsidies or state production, such commodities will be prohibited entry.

CENTRIST PARTY IN GERMANY IS DISSOLVED

Berlin, Germany.—Former Chancellor Heinrich Brüning announced the dissolution of the Catholic Centre party, last non-Nazi political party in Germany.

The statement issued by him said: "The Centre party has dissolved itself in agreement with the chancellor (Hitler)."

The extinction of the Centrists marks the end of the parliamentary party system in Germany as well as the end of political Catholicism. The Bavarian People's Party, allies of the Centrists, quit the political scene. Between these parties held 88 of 104 seats in the pre-Hitler parliament.

The Volkpartei, or People's party, of the late Chancellor Gustav Stresemann, which had only two relatively seats but was formerly much more powerful, also announced its dissolution.

These parties followed the lead of the Nationalists, who had combined with the Nazis in establishing the new regime last January, in vowing to dissolve the Nazi themselves, but have previously outlawed the communists, socialists and stateparties.

R.C.M.P. Promotions

Ottawa, Ont.—Two promotions to the rank of acting superintendent were announced from headquarters of the Royal Canadian Mounted Police here.

Inspector V. A. M. Kemp, adjutant of the force here, and Inspector Herbert Darling, assistant to the director of criminal investigation in Ottawa, receive these appointments as from July 1.

King Opening Big Dock

Southampton, Eng.—The greatest dry dock in the world, built at Southampton for the Southern railway at a cost of \$10,000,000, will be opened by the King July 26. During the construction of the dock, 2,000,000 tons of earth and mud were excavated from the site and 750,000 tons of concrete were used.

BUYING POWER OF WHEAT IS UP FIFTY PER CENT.

Winnipeg, Man.—Purchasing power of wheat in western Canada over "things that farmers buy today stands at 70 per cent. of the 1913-14 price, compared with 40 per cent. in April and only 22 per cent. on December 16, last year, when wheat fell to 38 cents per bushel in Winnipeg market and touched the lowest point in the history of the grain trade.

These figures are shown in the farmers' index chart compiled by the Seale Grain Company Limited. Index figures on livestock show cattle with purchasing power of 59 per cent. of the pre-war price; hogs 53 per cent.; and lambs 73 per cent.

Price of wheat used in the compilation is that paid to farmers at elevators in western Canada for No. 1 Northern on the 25 cents per 100 pounds freight, which is 15 cents a bushel.

In the things farmers buy are listed 146 items essential to an average grower in the west to carry on production.

There are 16 items of groceries, 37 items of clothing, 29 items of household equipment, 51 items of farm equipment, 11 items of farm machinery, and two items of municipal taxes in the list.

The compilation notes that the index of things farmers buy is still 27 per cent. of the 1913-14 level.

Tax Compacts

Duty Boosted On Imported Powder

Ottawa, Ont.—Mildred's aids to beauty are going to cost her more. Recently the Minister of National Revenue notified the manufacturers of imported cosmetics and powder prices from 3 to 10 per cent. More than that, this assault on the diminutive vanity case is retroactive to March 22, 1933, so that if Miss Canada has not already paid her 10 per cent. on the foreign prospect, the importer will be required to do so.

The increased tax applies to cosmetics, compact cases, or vanity cases, whether or not they contain any toilet preparation, and on powder pails and powder pads.

Woman Will Supervise Refueling Of Monoplane

Minneapolis Girls To Aid Post At Two Siberian Posts

New York.—Miss Fay Gillis, 23, of Minneapolis, will be in charge of refueling of Wiley Post's monoplane, "Winnie Mae of Oklahoma," at two Siberian posts on his projected world trip.

Lee Trenholm, Post's representative, said Miss Gillis had left Moscow on June 15 on the steamer plane to the arctic point to stop after leaving Berlin. While Post eats and takes a short nap, she will supervise refueling of the plane and make any adjustments the plane needs.

Trade With Russia

British Government To Take Into Account Anglo-Canadian Agreement

London, Eng.—A questioner in the House of Commons was assured by a government spokesman that the talks between Britain and Russia, the British government will take into full account. Article 21 of the Anglo-Canadian trade agreement.

This provides that where the imperial preferences are endangered by the importation of products sold at an unfair price because of state subsidies or state production, such commodities will be prohibited entry.

King Opening Big Dock

Southampton, Eng.—The greatest dry dock in the world, built at Southampton for the Southern railway at a cost of \$10,000,000, will be opened by the King July 26. During the construction of the dock, 2,000,000 tons of earth and mud were excavated from the site and 750,000 tons of concrete were used.

Light For Plant Growth

Various Varieties Respond Differently To Time Of Exposure

It did not require any "blue paper" from scientists for farmers to know that plant growth depended on the light, but what they did not know was that different species and varieties responded differently to the length of time they are exposed to light. It is only in recent investigations that scientists have recognized this fact, which is of particular importance to those who are growing flowers and vegetables under glass.

According to J. E. Boshop, of the Dominion Laboratory of Plant Pathology at Sault Ste. Marie, plants that bloom naturally in the long day period, will come more rapidly into flower (under glass) by increasing the length of day by artificial illumination. On the other hand, plants that naturally bloom during that period of the year when days are short, may often be induced to bloom under glass if the length of day is artificially shortened by shading.

Apparently the plants respond to what they recognize as their natural conditions, as did the plants that went to roost when the sun was in eclipse last summer.

In addition to those plants which are affected by long or short day periods, there is a third group, which cares little or nothing whether the sun shines much or not. These plants are not affected by artificial light in the greenhouse as to check certain greenhouse diseases such as mildew and leaf mold, which are apt to develop during dull days. Also the artificial light on dull days tends to harden the tissue and develop the root system of the plants.

Technical agriculturists are taking advantage of electrical lighting and shading to synchronize the growth and flowering of varieties they wish to cross. For instance it might be difficult to cross early and late varieties of peas if it were not possible to advance or retard the bloom by this artificial means. In all plant breeding and disease work, artificial illumination has been of the greatest practical importance, cutting down the length of experiments by years.

To get their reaction to more or less light, dozens of varieties of plants have been tested out together with its cost per kilowatt hour at the Dominion experimental station. The maturing period has been speeded up as much as ninety days in some cases retarded by the extra light.

As there are many cases of plants under glass in Canada, the result of this investigation is of much importance to the growers, as well as to the scientists who are developing new species or varieties of plants.

Steady night light has long been considered essential for grading grain. Now according to tests that have been made by the National Research Council, artificial lighting units have been perfected which are as good as daylight, and more uniform, for even all the day-long changes from day to hour.

Electricity has extended the hours which humans work and it is probable that some humans would work more effectively if the hours of daylight, natural and artificial, were restricted as has been found to be the case with plants.

Eligible To Compete

In Brocho Contests

Nine Canadian Champions May Ride At Chicago Rodeo

Nine Canadian champion bronco riders have been certified eligible to compete in the broncho riding contests at the World's Fair Rodeo at Soldier Field, Chicago, August 25 to September 10. It has been announced by the National Horse Show Association that three other Canadian cowboys are included in the list of alternates.

Canadian cowboys eligible to enter, in the order of their standings are: Bruce riding, Pete Knight, Crossfield; Harry Knight, Calgary; Canada Kid (Les Proulx), Calgary; Herman Linder, Cardston; backseat bronco riding contest, Smokey Snider, Kimberley; B.C.; Hughie Long, Battiford; George McIntosh, High River; Herman Linder, Cardston, Sask.; Canada Kid, Calgary. Included in the list of alternates are: Ryken Robertson, High River, in the bronco riding contest, and Frank Sharp, High River, and Peter Forrester, Calgary, in the backseat bronco riding contest.

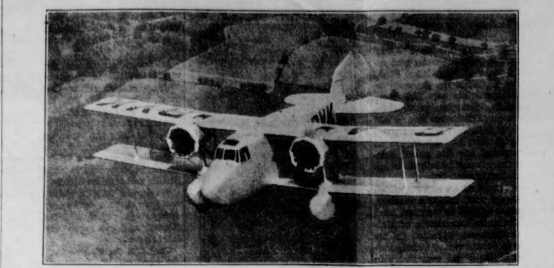

Losses from fire in London, England, last year totaled \$3,304,025.

A wise man would rather be ignored than bored.

Mexico has enacted a law to prevent speculation in exchange.

W. N. U. 2092

ENGLAND DEVELOPS NEW TRANSPORT PLANE

Our picture shows a new transport plane which has been built for the British Air Ministry, undergoing trial flights at Muskox Aerodrome, Norwich. This giant machine has been designed to carry 1,000 pounds of mail for at least 1,000 miles, and has a cruising speed of more than 150 miles per hour. Its top speed is more than 200 miles an hour.

Myster Man Of Europe

Even Notionality Of Muntions King Is Not Clear

St. Basil Zaharoff called the mystery man of Europe because little is known of his origin. Even his nationality is not clear. But it is known that he is one of the largest owners of munitions stock in the world. His life is nearing its end and it is said he gives away millions for charity, seeking to make amends for the men who have been killed in the wars he has encouraged and the men and women who have committed suicide after losing everything they owned in the big game at Monte Carlo, owned by him.

He took in the munitions business early in life and history shows him to have been peddling arms to Japan before 1904. A sale of \$25,000,000 to Spain put him on his feet. Then he gained control of Vickers; he bought armaments plants in almost every large country in the world, including Canada; he was part owner of the famous German Krupp. He took over the sale of Maxim's machine guns, and while Maxim was still in Spain, during the Spanish-American war, before 1914, his plants were manufacturing war munitions as quickly as they could be made. To every country he sold them. This was the crowning achievement of his life. Millions upon millions of dollars poured into his coffers. To Canada he sold his guns. To the other he loaned money—all for the purpose of killing. He apparently sided with the allies, became a boom friend of Lloyd George and was knighted by the King. After the war business in armaments slumped. But Sir Basil had other irons in the fire. He bought Monte Carlo and made it pay huge dividends. He purchased great tracts of land where all could be obtained the threat of the supremacy of Rockefeller and the Standard Oil Company of the United States and of Sir John D'Almeida.

He bought Monte Carlo and made it pay huge dividends. He purchased great tracts of land where all could be obtained the threat of the supremacy of Rockefeller and the Standard Oil Company of the United States and of Sir John D'Almeida.

Girls Sailed As Apprentices

Two Make Trip On Windjammer Round Cape Horn

Two 17-year-old girls have captured the imagination of every sailor as well as every student in Falkland. They sailed as apprentices in the barque "Parma," which has just won the Australian grand tour for big windjammer for the second year in succession, with a magnificent passage of 83 days.

The girls are Marina, daughter of Captain de Cloux, skipper of the "Parma," and her friend, Sonja Lind, daughter of a retired Norwegian sea captain.

They have eaten salt horse and shark steak; they have been aloft well south of the ice-line, when the skipper was driving his ship round Cape Horn; and they have answered the call for all hands on deck when the ship was plugging it 13 and 14 knots through the southern Atlantic.

Co-operative societies are being encouraged by the government of Spain.

Nearly 300,000 London school children are given free milk every day.

Joe says—"A bachelor is a man doesn't make the same mistake: care."

Efforts To Save Drowned

Artificial Respiration Should Be Continued Four Hours Or Longer

The Toronto Mail and Empire says: We pointed out recently the necessity of continuing, until effort to resuscitate persons who apparently are drowned. The advice is emphasized by the Metropolitan Life Insurance Company in an advertisement which appears in Collier's Magazine.

"Continue artificial respiration for four hours or longer if necessary. When changing operators, do so without losing count. Not infrequently the patient, after temporary recovery, stops breathing. Resume artificial respiration at once. Thousands upon thousands of lives have literally been snatched from death by this method of life saving. As a world-famous physiologist puts it: 'Often, in drowning, electric or gas cases, the vital machine merely needs to be started again. It is like cranking an automobile when the engine has stalled and the self-starter is out of order.'"

Unusual Out Exhibit

Competitor At World Grain Show Is Seattle, Wash.

Out farmers of Canada are challenged by a woman farmer from Scotland. One of the entries in the competitive classes at the World Grain Exhibition in Regina is Mrs. Maggie Eccles of High Pittmore, Maybale, Ayrshire.

She has entered a sample which is out of the nation from a farm which is in her family for over 60 years. Mrs. Eccles operates a 230-acre farm close to the birthplace of Robert Burns, the poet, special attention being paid to oat production. In 1913 Mrs. Eccles won the gold medal for grain at the national and grain show at Edinburgh.

Estimating His Salary

A well-known attorney was always lecturing his office boy, whether he turned or not. One day he chanced to hear of following conversation between the boy and the one employed next door:

"How much does your chief pay you?" asked the latter.

"I get \$1,500 a year. Five dollars a week in cash and the rest in legal advice."

Transits through the Panama Canal are increasing.

Definition: A spendthrift is one who uses an adjective in a telegram.

FANCFUL FABLES

An Interesting Race

Old Harges On Thames Take Part In Contest For Championship

The art of growing old gracefully and of showing a bustling world that the claims of sport are not the monopoly of youth was demonstrated at London, England, when coxswain, row-sport and stately barges took part in the race for the championship of the Thames. The course is from Lower Hope Point to the Mouth Lightship and back to Gravesend, a distance of almost 40 miles. Most of those representatives of an industry whose genesis goes back to the 14th century, are in the prime of their life, which records show, in one case at least, is 130 years.

Of those who earn their living on the river, the bargemen are remarkable for the small number of casualties they suffer compared with the great risks they run. Whether they are groping their way among the miscellaneous craft in the pool or skimming to and fro the river amid a procession of steamers in the lower reaches, the masters appear to have nerves of steel to overcome the hazards they take. On to the shore they almost steer before turning their craft about to anchor at the pool or wharf, to make the hazardous trip.

For the last fortnight or more before the race the barges go through a severe preparation, and their crews work hard to achieve the degree of perfection required throughout the contest. There is no flying start as in yacht racing. All the barges are anchored at the pool or wharf, and to the shore they almost steer before turning their craft about to anchor at the pool or wharf, to make the hazardous trip.

A beautiful scene meets the eye as this miniature fleet of river and coasting barges the latter carrying a greater area of canvas, sweeps to windward, the blackheaded hulls giving relief to the muddy waters which are shipped into a foam of dirty white as the barges cut their way through the breasting land of the river past the New London Lightship. There they wheel around in their own length, and the smallest part of the race begins on the return for home.

All the arts of legitimate sailing are shown in use; the dinghies and bluntings as one competitor after another seizes an opportunity for advantage. Round the tortuous course, the river side, which is at length the final lap marked by the Ovens buoy brings them into Gravesend Reach. A few minutes more and the race was over.

The "Independence" was wrecked November 22, 1853, when her boiler blew up and four men were killed. Weeks ago bits of metal plating, copper plates, pipe fittings and hand wrought iron rings were salvaged. It was the first salvage operations on the historic steamer since she was brought up material for world-fair exhibits in 1892.

The "Independence" was built at Glasgow and brought to Michigan in 1845 in the fall of 1845.

Touring World On Bicycle

Retired Liverpool Policeman Has Already Visited 28 Countries

With his entire belongings strapped to the handlebar of his cycle, an ex-policeman aged 55, rode up to a ship at Liverpool and embarked on a five months' world tour.

He was John R. W. Crawford, of Sunderland, and he was sailing for Halifax on the Furness Wylly line "Newfoundland."

He was retired from police service in 1919 Mr. Crawford has made cycling his hobby, and has visited 28 countries on cycle tours, covering 130,000 miles.

He will spend three months in doing the 3,000 miles across Canada, and will then go on to Japan to continue his world cycle tour.

Archaeologists have unearthed a kitchen sink said to be 5,700 years old.

The French mine-laying submarine "Diamant" was launched recently at Moutillen.

One may have good manners but not carry them about with him.

A secret is never too good to keep or not worth keeping.

Simplified English

Ordinary Conversation Can Be Carried On With 800 Words

Foreigners state that they are learning the English language very difficult. Possibly that is not because of the number of words, which are plenty enough for all conversation, but the new Oxford dictionary is said to contain over half a million, but the vast majority of the words are seldom used. The course is from Lower Hope Point to the Mouth Lightship and back to Gravesend, a distance of almost 40 miles. Most of those representatives of an industry whose genesis goes back to the 14th century, are in the prime of their life, which records show, in one case at least, is 130 years.

An Englishman, C. K. Ogden, of the Orthological Institute, Cambridge, has been working for ten years on the production of a simplified English language. He calls it "Basic English," and it consists of only 850 words, but it is said to be as good as the original. It is said to be as good as the original. It is said to be as good as the original.

His 850 words are arranged in a sheet of paper, and he claims that ordinary conversation can be carried on by these words. It is said to be as good as the original. It is said to be as good as the original.

The Oyen News

About Town and Country

Rev. E. F. Kemp was a visitor in Youngstown last Friday evening to attend and take part in the induction service for Rev. Thomas Smeddon, recently of Nording, to the pastoral charge of Youngstown. Rev. Fred Chapman, Craigmyle, presided at the service. Rev. E. F. Kemp gave the charge to the minister and Rev. W. H. McDonald, B.A. Della, gave the charge to the congregation. Following the impressive service, a social was held and a delicious supper served.

Mrs. Chas. L. Dunford and son Brian returned to Oyen this evening after spending four days in Kandersley as guests of Dr. and Mrs. W. D. McPhail.

Mr. E. N. Charbonneau left yesterday for Calgary to spend a few days in the city.

Mr. F. C. Bliss is leaving tonight on a vacation.

Rev. and Mrs. E. F. Kemp and family will be leaving at the end of the present month for a vacation. During the absence of the pastor, no services will be held in Oyen Pastoral Charge (Sunday, July 30 to August 27, inclusive).

Excel Items

Mr. and Mrs. R. E. Bishop and family and Mr. F. E. Bishop have been motoring for the past ten days in the district between Calgary and Edmonton.

Miss Frances MacDonald who motored to her home in Mirror last week was accompanied by Mrs. C. Ferris and son Connie and Miss Ina Anderson. Ina will proceed from there to Leslieville, where she will visit the Stevenson family.

Everyone is welcome to the basket picnic which will be held in J. R. Anderson's grove on Wednesday, July 19, under the auspices of the Excel U.F. W.A.

OBITUARY

Mrs. HAROLD McDONALD

A funeral service was held on Sunday, July 2, 1933, for Mrs. Harold McDonald at the family home in Oyen, at one o'clock in the afternoon, and interment followed at Oyen cemetery. Rev. E. F. Kemp, officiating.

Mrs. Harold McDonald, formerly Idella Elizabeth Louthan of Arcadia, Ill., was born February 9, 1863, and died at her home in Oyen, Friday, June 30, 1933, after a lingering illness. Besides her husband she is survived by four small children.

The following friends acted as pallbearers: Mr. E. N. Charbonneau, Dr. J. P. Kerr, Mr. J. Mahaffey, Mr. J. Lees, Mr. S. E. Twilman and Mr. Fred Twilman.

Here and There

Almost \$20,000,000 was spent in the manufacture of toilet preparations in Canada in 1932. A recent official report states that the total value of the former product was \$2,075,134, and of the latter \$19,214,849.

Forty boy scouts of Oregon and Washington made the first leg of their 8,000 mile trip to Budapest in the Princess Kathleen, Seattle to Vancouver. They are travelling C.P.R. across Canada to Quebec, where they will sail for England on the Princess of Britain.

Alaska and the Yukon hold their popularity as summer playgrounds judging by the sizable list of passengers sailing north to Skagway in Canadian Pacific coastal liners. Many of them are mining and business men, but the majority are summer tourists attracted by the rate reductions for summer Alaska travel.

Forty-three years of "active, loyal and efficient service" with the Canadian Pacific Railway closed June 30 with the retirement of W. A. Gittermaster, General Western Freight Agent, Chicago. He was succeeded by E. L. Cardie, Assistant General Freight Agent, and the office which the latter vacated was abolished.

For the first time since its foundation 33 years ago, a Governor-General of Canada was present at the annual closing exercises of the Boys' Farm and Training School, Shawbridge, Que., recently, when the Earl of Beaulieu, accompanied by E. W. Beatty, chairman and President, Canadian Pacific Railway, attended the school and awarded prizes to graduates.

There are tangible signs of business and economic improvement in Canada and the United States. Sir Joseph Stamp, Director of the Bank of England, President of the London, Midland & Scottish Railway, and one of Britain's leading economists said recently when he sailed for England on the Canadian Pacific liner "Empress of Britain" after a short visit to this continent.

Ten Honolulu youths between 14 and 17 years of age arrived recently at Vancouver on Canadian Australasian liner "Honolulu" en route to the Yukon where they will spend the summer in scientific research and adventure. They will sail north to Skagway, go into White Horse where they will build boats for the run down the Yukon River to Dawson.
